

# Old World

Double soffit system creates a **ceiling** well to feature paneled beams, finished and aged to match cabinets. Accentuates Old World ambiance, recognizing the ceiling as an integral component of the décor.

Furniture styled mantel **hood** stylishly provides appropriate ventilation for the five-foot professional range. The mantel is adorned with grape and leaf carvings embellishing the Tuscan theme.

Glass fronted wall **cabinets** add dimension to the cooking niche, dropping to the counter each end to provide small appliance garages. A Sea Foam granite backsplash extends full height.

A cherry wood stained **island** contrasts the glazed perimeter finish. Carved comer corbels and Bombé styled ends enhance the freestanding furniture feel. Sits atop Walnut travertine pavers set in a Versailles pattern.

Vertical **refrigerator and freezer** sport paneled door fronts. With a display area and counter in between, the elevation appears furniture like instead of utilitarian.
