

# Transitional

Decorative pendant **lighting** follows the island length to the circular seating from cable mounted track. Task lighting, in the form of recessed downlights, illuminates the working surfaces.

Transitionally styled alder wood **cabinets** have a simple recessed panel door with applied moldings to add depth. Drawers are styled flat providing focus on the elegantly styled curved stainless pulls.

Polished and matt metallic **backsplash** tiles are installed diagonally above a granite ledge providing a pizzazz punch of reflective surfaces.

A stainless steel cylinder supports a circular extension of the island granite **countertop** providing comfortable seating for casual dining and socializing with the cook.

Two feet square travertine marble **floor** tile is installed diagonally throughout the open plan first floor providing a sense of expansiveness to the modest square footage.
